NIHR | BioResource

Immune-Mediated Inflammatory Diseases (IMID) BioResource

Led by the NIHR Biomedical Research Centres (BRC):
Manchester Newcastle, Leeds

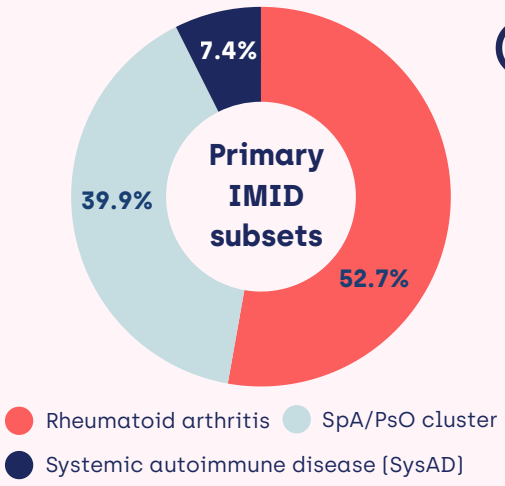

19,000+ participants*

Focus on Black and South Asian patient recruitment from October 2024

***as of August 2026**

Main disease areas

1. Rheumatoid Arthritis
2. Psoriasis and Seronegative Spondyloarthropathies
3. Systemic Lupus Erythematosus (SLE) and related conditions

Information collected on cross-cutting co-morbidities

- Pulmonary conditions
- Cardiovascular diseases and risk factors
- Fatigue / mood disorders

Data types available

- Genotype Array
- Health and Lifestyle Questionnaire
- Clinical Report Form

Current studies

'Interrogating and redefining 'difficult to treat' rheumatoid arthritis (RA) and mapping its traits to early RA', University of Manchester

'Using AI to inform treatment decisions: app to help doctors care for patients with lupus', VISFO

Participants consent for:

- collection of health and lifestyle data
- access to health-related records
- biosample (blood, or saliva) analysis, including genomics
- invitation to participate in future research studies
