

# NIHR | BioResource

NIHR BioResource Centre University College London Hospitals (UCLH) Since joining the NIHR BioResource in 2013, the UCLH Centre has recruited over 12, 000 patients and healthy controls available for recall into research studies. Patients are drawn from across the UCLH Trust including the National Hospital of Neurology and Neurosurgery, the largest dedicated neurological and neurosurgical hospital in the U.K.

A wide variety of research is supported by the UCLH BioResource Centre. Including participant recall studies as well as pure data analysis using machine learning techniques combining genetic and imaging data.

If you would like to find out more about the UCLH BioResource, please click [here](#)

[Prof. Nicholas Wood](#) is the Lead Investigator for the UCLH BioResource. Professor Wood is the Research Director of the UCL Institute of Genetics and Galton Chair of Genetics
